

Hughes Recruitment is pleased to present an exciting opportunity on behalf of our client.

Role: Sr. Architectural Technologist

Location: Regina

OUR CLIENT

Our client is a Regina-based architecture and design firm founded on the principles of listening and learning from clients to fully understand their needs and realize their vision. They pride themselves on delivering innovative, sustainable projects tailored to each client through an inclusive and collaborative design process.

Their team combines the legacy of 60+ years of architectural project delivery with the vibrancy of a dynamic and innovative design team passionate about creative, collaborative, and conscientious design. With a staff of 24 including architects, interior designers, planning experts, and technologists, our team thrives on the unique challenges and learning opportunities each new project brings.

THE OPPORTUNITY

Our client believes in design and its power to transform – quite simply they know that design can change the world one detail, one room, and one building at a time and they thrive on the continuous growth this mission brings.

Currently, our client is seeking an experienced Senior Architectural Technologist to take on a leadership role in project delivery.

We would love to have a conversation with you if you have:

- ✓ Excellent technical aptitude
- ✓ Strong communication skills
- ✓ A passion that matches our client's mission

KEY RESPONSIBILITIES

Reporting to the Principal Architect, the Sr. Architectural Technologist will be responsible to:

- Apply architectural concepts, building codes, and zoning requirements to develop architectural design documents to the satisfaction of the client(s)
- Prepare and assemble drawings sets from schematic design through to construction administration in Revit or CAD;
- Ensure all work meets our client's standards for quality
- Complete work upon agreed deadlines
- Contribute to office activities, initiatives, and learning programs

QUALIFICATIONS

Successful candidates will possess:

- Diploma from an accredited Architectural Technology program
- 8+ years' experience in design, construction documents, and contract administration
- Mastery of building technology and assembly, construction methodology, and materials application
- Expert skills in REVIT
- Proven skills in contract administration and shop drawing review
- Ability to understand and formulate design decisions and present for discussion
- Fully versed in the National Building Code of Canada
- An excellent eye for detail
- Ability to work independently as well as in a highly collaborative team
- High degree of self-motivation and good judgment
- Strong communication and interpersonal skills
- Thrive in an environment with tight timelines and the ability to work under pressure

WHAT OUR CLIENT OFFERS

Along with working with a fun, dynamic, and close-knit team, our client offers a fast-paced working environment that includes work-life balance, competitive salary, generous benefits package, tuition reimbursement, team building, and more.
