# Director of Engineering Saskatoon, SK

We are looking for a Director of Engineer to join our growing team. The Director of Engineering oversees the provision of engineering services including governance, team leadership, and quality control. Reporting to the General Manager, the Director of Engineering ensures successful engineering project delivery, provides continuous improvement of processes and procedures, and develops the knowledge, skills, and abilities of the engineering, project management, and drafting teams while fostering an environment that values communication and understanding.

## **Key Responsibilities:**

- Ensure the work of the engineering department aligns with best practices, quality standards, and company requirements
- Develop, implement, and govern project management processes, dashboards, templates, policies, and metrics
- Monitor engineering department compliance with policies, procedures, and standards
- Manage department staffing requirements in line with company objectives
- Coach and mentor engineering, project management, and drafting teams
- Set annual performance targets for direct reports and conduct performance reviews
- Provide guidance to strengthen knowledge of project management best practices within both the department and the company
- Provide the management team with the knowledge and information needed to assess and decide which projects have the highest potential value, impact, and strategic alignment
- Work with management team to define project priorities, implementation opportunities, challenges, and communicate project risks and opportunities
- Increase the visibility of the company and its services offerings

## **Required Qualifications:**

#### Education

- A bachelor's degree in engineering
- Registered or eligible for registration with APEGS as a Professional Engineer
- PMP certification

#### Experience

- 5 to 10 years of experience in project management at a high level
- Proven success in a people management role

## Knowledge/Skills/Abilities

- Excellent communication, collaboration, and delegation skills
- Ability to motivate and lead employees and hold them accountable
- Strong skills in budget development and oversight
- Proficiency in PSA or ERP systems

#### **Competencies:**

- Leadership: Organizing and influencing people to believe in a vison while creating a sense of purpose and direction
- Planning and Organizing: Establishing courses of action to ensure that work is completed effectively
- Decision Making: Analyzing all aspects of a situation to make consistently sound and timely decisions
- Project Management: Identifying and overseeing all resources, tasks, systems, and people to obtain results
- Personal Accountability: Being answerable for personal actions

The Crane Inspection and Engineering Professionals
