

A P E G S

*Association of Professional Engineers
& Geoscientists of Saskatchewan*

Policy Number: LAC1.0

Policy Name: Licensee Eligibility

Effective Date: June 12, 2020

Policy: Following are the education and experience requirements established by Council as qualifications for Engineering / Geoscience Licensees.

Category *	1	2	3
Education Requirement	Four-year science degree from a university program acceptable to Council.	Diploma in engineering or geoscience technology from a program acceptable to Council. The program must be of at least two years duration (equivalent to technologist, not technician).	Other education acceptable to Council – successful completion of a minimum of two years of post-secondary bachelor’s degree in engineering, geoscience, or related science.
Experience Requirement*	Minimum five years of acceptable post-degree work experience.	Minimum eight years of acceptable post-diploma work experience.	Minimum eight years of acceptable post-study work experience.
Application Type	Scientist	Technologist	Other

*For all categories – a minimum of five years of work experience must be obtained under the direct supervision of a Canadian or equivalent P.Eng., P.Geo., Engineering Licensee or Geoscience Licensee. Also, the applicant must have at least five years of acceptable experience within the requested scope of practice.

Rationale: To establish a firm policy that clarifies the combined education and experience requirements for licensee applicants.

Council Motion: 22-009:B

Date of Motion: February 3, 2022

Reason for change: Clarify Canadian or equivalent requirement.

Council Motion: 20-083:D

Date of Motion: June 12, 2020

Reason for change: New Policy
