

Intermediate Geoscientist (41483)

Location: Saskatoon, SK

About Us

Cameco is one of the largest global providers of the uranium fuel needed to power a secure energy future. Utilities around the world rely on our nuclear fuel products to generate safe, reliable, emissions-free nuclear power. Cameco's corporate office is based in Saskatoon. We have mining operations and projects in northern Saskatchewan, Kazakhstan, the United States and Australia. We are also a leading supplier of uranium refining, conversion, and fuel manufacturing services from our operations in Ontario.

The Role

The Intermediate Geoscientist is part of the multi-disciplinary Geo-Environmental Engineering team within Cameco's Safety, Health, Environment and Quality department. This team provides subject matter expertise to support our mining and milling operations in developing and executing environmental monitoring programs and managing tailings and waste rock through all phases including design, operation and reclamation. The position will be based in Saskatoon with periodic travel to northern Saskatchewan-based operations.

This position will provide you with the opportunity for professional growth and the ability to make a meaningful contribution in the safe and environmentally sound production of uranium, which is critical to fuelling the world's transition to clean energy.

In this role, you will:

- Provide subject matter support in mine waste geochemistry and assist in a broad spectrum of other geoscientific disciplines such as geology, hydrology, and reclamation.
- Support technical, operational, and regulatory aspects of facilities and projects within Cameco's mining division.
- Support senior geoscientists with a variety of project and operational challenges, contributing to Cameco's goal to ensure safety and environmental standards are met.
- Have excellent communication and interpersonal skills as success depends on building and maintaining relationships and trust with our mining and corporate office teams.

Required:

- Bachelor's degree in the field of environmental geoscience
- Three or more years of experience in applied geoscience including field investigations and data analysis
- You must be eligible for registration with the Association of Professional Engineers and Geoscientists of Saskatchewan (APEGS)
- Proven capability in writing reports and technical communications

Recommended:

- A graduate level degree in geoscience
- Experience encompassing both geochemistry, geology and hydrology
- Environmental consulting background
- Experience at a mine site environment with a strong emphasis on safety and compliance

Cameco is proud to offer a competitive total reward package which includes:

- Competitive compensation program with base and variable pay
- Flexible health, drug, dental, and vision plan with a health spending and personal spending account
- Fixed benefits including employee and dependant life, AD&D, disability benefits and paid vacation leave
- Employee & Family Assistance Programs
- RRSP and RPP matching program
- Career development opportunities
- Relocation costs

Cameco is an employment equity employer and aims to achieve gender parity, and as such, preference will be given to qualified members of equity groups. We are strengthened by the diverse backgrounds of experiences and encourage applicants with various levels of expertise to apply, as equivalent combination of education and work experience are considered.

This position is eligible for the employee referral bonus.
