

Job Title: Project Manager, Northern Engineering (Temporary 12-month term)
Competition #: SW-15-2026
Location: Prince Albert (On-Site)
Salary: \$7,988 to \$10,384 per month (\$95,856 to \$124,608 annually)

Immerse yourself in a team committed to creating trusted and sustainable water solutions for a vibrant Saskatchewan. A team backed by a corporation with over 60 years of experience providing water and wastewater services. That's a lot of knowledge.

But there's more. SaskWater offers an attractive benefits package including employer-funded health, dental and vision benefits, pension, and disability insurance, plus vacation leave, earned days off, and paid family leave and sick leave. At SaskWater you can take advantage of extras such as flexible work options, a tuition reimbursement program, employee family assistance plans, maternity leave top-up and more. H2Wh0a!!

Now that's refreshing! Apply today.

As the Project Manager, Northern Engineering, you will manage projects within the Operations & Engineering Division Capital Program; provides senior engineering/specialized support to the organization and functions as a leader and mentor on project management processes for the organization.

Key Duties and Responsibilities

This position manages multiple projects of varying complexity within the Operational and Capital Programs, including preparing project plans, identifying resource requirements, scheduling, preparing budget estimates and risk assessments, and providing recommendations to Senior Management for critical project decisions.

The role directs and oversees the work of consultants and contractors, reviews designs, documents, invoices and reports to ensure sound project management judgment and practice, liaises with key project stakeholders on project status, and chairs project team meetings.

The Project Manager is also responsible for the overall procurement process for new projects, recommends awards to senior management, maintains proficiency in project management best practices, and serves as a corporate leader and mentor on project management processes.

In addition, the position is accountable for project contract administration, including change management, cost control, budget monitoring, invoicing and scheduling; coordinates with internal engineering resources for construction supervision and site inspections; oversees construction quality control and quality assurance, approvals and permitting; and ensures projects are delivered on time and within project constraints.

To qualify, you will have a Degree in Civil Engineering or a similar discipline, Professional Engineer Status (P.Eng.) and a valid Class 5 Driver's License. In addition to the above qualifications, the job requires 6 years of progressively more responsible experience in project management, construction management, contract administration, coordinating engineering activities and OA/QC implementation.

Special Requirements: *The position requires the incumbent to undergo a Criminal Record Check and Drug and Alcohol test. You must be legally entitled to work in Canada. A valid Saskatchewan driver's license is required.*

Application Deadline

September 14, 2026, at 5:00 p.m.
